More 'pagne, less grain

BEER HAS LONG been the staple of Australian pubs and clubs. Throughout 2011, however, there has been a noticeable shift away from this type of drink, particularly towards two substitutes. The two drinks that have noticeably become more popular are cider and champagne.

More pubs are making the move to put cider on tap, and figures show that cider sales have increased 35 per cent in the past year.

Champagne has also witnessed surging sales, with an increase of 25 per cent from 2009.

In turn, as it becomes increasingly popular to opt for sweeter, fancier drinks, grain-based beer sales are dropping.

Perhaps it's time to sit back and relax with one of the many cider varieties or a glass of champs!
